

Protect Your Avionics/Cabin Glass From Dirt And Static Build-Up For Up To 7 Weeks

Introducing **Alglas'** unique range of highly approved **Aviation Cleaning Products**. **Alglas** produces specialized cleaners for application on the cockpit, cabin glass and instrumentation of civil and military aircraft. **Alglas** products have been in commercial use by airlines since June 1987 and have over 27 OEM approvals including **Boeing, Airbus** and the **Ministry of Defence**

Aircraft cleaning problems?
Here are four great solutions...

AIRCRAFT GLASS CLEANER AGC/22 (1LT trigger spray)
AGC is a versatile and highly effective product that will remove all marks and stains from both cockpit windscreens and passenger cabin windows, inside and out. These marks include jet-efflux as encountered when flying into busy airports. Also fly, bug and moth debris which smear the screen on airport approach and departure.
Packed: 12 x 1 litre per carton

VDU CLEANER VISIAL (150 ML mist spray)
Non-flammable with remarkable cleaning and antistatic properties. Marconi Instruments' testing and evaluation of PCs cleaned with **Visial** showed static was reduced from 3KV to 0.2KV and this was maintained for a period of seven weeks without further application. The resultant acuity of instrument and CRT readout information is significantly improved.
Packed: 12 x 150ml mist-spray applicators per carton

VISIAL WET/DRY WIPES - ALG/CR215
Used to clean all aviation, aerospace and marine radars, electronic position fixing and charting systems and general instrumentation, no matter where they are located.
Packed: 1000 twin wet/dry sachets per carton

New & Exciting Development

BIOCIDAL DISPLAY SCREEN CLEANER - ALG/RCBA

Our new product **ALG/RCBA** has been designed specifically to clean safely and effectively the touch screens and the S.D.U. housing (with or without "Clearcoat") of in-flight Entertainment Screens. IFE's are prone to static electricity build-up which attracts dust. Sweat and grime from passengers' fingers reduce the clarity of the display, resulting in poor picture quality.

Packed: 150 wet wipes per bucket
